

Infection-Associated Chronic Neuropsychiatric Impairments

Webinar Resources & Further Reading

AONM Webinar with Professor Bransfield – 7th April 2026

Following the session, Professor Bransfield kindly shared a collection of additional resources, including articles, links, and supporting materials, which may be of interest for further exploration of the topics discussed.

For ease of access, these resources have been compiled into the document below.

Disclaimer

The resources included in this document have been provided by Professor Bransfield following the webinar. They are shared for informational purposes only and do not necessarily reflect the views, opinions, or official position of AONM. AONM does not independently verify or endorse the content of external resources.

Attached are the assessments, based upon: <https://pubmed.ncbi.nlm.nih.gov/31935905/>

Video Resources:

Videos on the subject of Infection Associated Neuropsychiatric Illness. There are 618 slides in this project, and they are divided into 16 separate presentations. It will take a total of 5 hours to view all of the presentations. The 16 Infection Associated Neuropsychiatric Illness videos are: Introduction, History, Infectious Agents with Psychiatric Manifestations & Examples of Mental Conditions

Associated with Infections, Pathophysiology, Epidemiology and Global Stability, Microbes and Dementia, Assessment, Assessment of Children, Laboratory Testing, Syphilis, Toxoplasmosis, COVID-19, Lyme/Tick-Borne Disease, Strep, PANS/PANDAS, Conclusions and Future Directions. Start with: Infection Associated Neuropsychiatric Illness: Introduction [Infection Associated Neuropsychiatric Illness Introduction — Mental Health & Illness](#)

It is on this website:
